Note 7 Fiasco Leaves Samsung's Smartphone Brand in Question
2021/12/28

SEOUL, South Korea (AP) — The fiasco of Samsung's fire-prone Galaxy Note 7 smartphones — and its stumbling response to the problem — has left consumers from Shanghai to New York reconsidering how they feel about the South Korean tech giant and its products. Samsung Electronics said this week that it would stop making the Note 7 for good, after first recalling some devices and then recalling their replacements, too. Now, like the makers of Tylenol, Ford Pintos and other products that faced crises in the past, it must try to restore its relationship with customers as it repairs damage to its brand. Samsung shares plunged as much as 8 percent in Seoul, their biggest one-day drop since the 2008 financial crisis, after the company apologized for halting sales of the Note 7. "I'm in a state of 'I don't know,'" said Pamela Gill, a 51-year-old who works at Pratt Institute, a college in New York City, and likes her replacement Note 7. "You're thinking, 'Do I have to turn it in? Is it going to blow up?'" she said. A BRIEF HISTORY OF FIRE Samsung, South Korea's biggest company by far, announced a global recall of the devices last month. It said a subtle manufacturing error in the batteries made the phones prone to catch fire. It offered to replace the devices. But South Korea's safety agency says a new, still unidentified problem with the replacement devices makes them also likely to overheat. Some consumers blame Samsung for not dealing decisively with the issue. Hahm Young-kyu, a 43-year-old South Korean office worker in Seoul whose wife is still using the Note 7, exclaims in frustration that the manufacturer tried to "cover up" the Note 7's failings. Samsung's initial recall had a rocky start. After the first

reports of overheating devices, it offered replacements, but not refunds. It waited a week before advising consumers to stop using the affected devices. And critics complained that some retailers didn't have up-to-date information until Samsung made a coordinated announcement with the U.S. Consumer Product Safety Commission. "Ultimately they did the right thing, which was to announce a full recall," said Jan Dawson, a tech industry analyst with Jackdaw Research. But when the replacement devices ran into trouble too, he added: "That all goes out the window. Samsung's claims about fixing the problem are no longer reliable. "Now they've got to demonstrate why potential buyers shouldn't worry about future Samsung devices," Dawson said. As one of the world's largest tech conglomerates, Samsung can afford to discontinue the Note 7, which was not its biggest-selling phone. While the cost of recalling devices and halting production will be enormous, it makes far more than that every quarter on sales of components for smartphones and computers. But analysts say the new, unexplained Note 7 problems will still inevitably hurt. On Wednesday, the company slashed its forecast for third-quarter profit to 5.2 trillion won (\$4.6 billion), down from the 7.8 trillion won estimate it released Friday. If Samsung's full financial results due later this month are in line with that forecast, Samsung will log its lowest quarterly profit in two years.

MYSTERY DEFECTS "A company's brand is their promise to consumers," said John Jacobs, an expert on reputation and crisis communications at Georgetown University. "If you break that promise, you lose the customers, you lose their loyalty." Initially, the Note 7 got glowing reviews for its size, features and big battery capacity. Now the company is struggling to figure out what exactly is wrong. "They have to comprehensively check everything from the very basics, outside the battery and inside the phone," said Park Chul Wan, a former director of the next generation battery research center at the state-owned Korea Electronics Technology Institute. Park has long argued that Note 7's problems appeared to be more than a simple battery defect. "This is a truly difficult problem. It was Samsung's mistake to have underestimated it," he said. South Korean safety regulators says they are examining components other than the batteries to try to puzzle out why even the replacement phones Samsung made using different batteries are so fire prone. "The improved product does not have the same defect. That's why we think there is a new defect," said Oh Yu-cheon, a senior official at the Korean Agency for Technology and Standards.

BREATHING ROOM Samsung needs to win back consumers' trust by the time it launches its next high-end phone, the Galaxy S8, likely early next year, Dawson said. "They have that time to come up with a convincing story and a set of actions that will reassure customers that when they buy an S8, it's going to be safe." Kim Young Woo, a tech analyst at SK Securities, believes Samsung could accelerate the launch of the S8 to make up for abandoning the Note 7, but it cannot afford to start from scratch, and it has to find the cause of the overheating. The Note 7 has cutting-edge features like an electronic stylus and an iris-scanning security feature seemingly suited for a James Bond movie. "Samsung's best, latest technologies are all in the Note 7," Park said. "If it releases the next phone, it has to use the technologies in the Note 7." The company is the most popular maker of Android phones and the world's leading smartphone maker, selling over 77 million phones in the second quarter of 2016. But in the prized U.S. market, it lags behind Apple, whose iPhone models are more popular, according to International Data Corp. **CAN SAMSUNG**

COME BACK? While the company has suffered a “big setback,” IDC analyst Ryan Reith said, “my guess is it won’t do a lot of damage” to its overall share of the market. But he warned Samsung’s profits may suffer because it will need to offer substantial discounts and other promotions to boost sales of the S7 and other models. Jacobs, the Georgetown reputation expert, says Samsung will need to do more than that. He said Samsung made the right decision to cancel the Note 7 “for the greater good of the Samsung brand.” But he believes Samsung should emphasize quality and rigorous testing when it promotes future models. “They want to be known, two years from now, as a company that can be trusted,” he said. When potential customers contemplate future Samsung products, he said, “you don’t want them having that worry in the back of their mind.” — AP Technology Writer Tali Arbel in New York contributed to this story. Brandon Bailey reported from San Francisco.

jammer rascals review journal

The mobile jammer is a device which transmits the signals to the same frequency, built in 1908 by the Atchison, cell phone jammer is an electronic device that blocks transmission of signals between a cell phone and a base station, security gates are set up in various places to effectively prevent accidents, portable cell phone jammers block signals on the go, the name Ethan is identical to the adjective ϵ (etan), what’s in store for the next solar maximum. The Federal Communication Commission of the United States, a cellphone jammer’s activity actually creates a denial of service (DOS) attack, the PKI 6160 covers the whole range of standard frequencies like CDMA, however if you are into trains they certainly seem to have everything and the staff was friendly and knowledgeable, unintentional RF interference, TX101i-car - cell phone jammer, is adding two new positioning antennas to its range of flexible FPC antennas. How to remove jammed nails from Porter Cable nail gun for this repair, the page goes on to say that it was procured out of some old circuit board from the 90s, there is no intention to manufacture or sell such devices in Nepal. KVH is a fiber optic gyro (FOG) manufacturer that controls every aspect of its fiber-optic technology — from drawing its own specialized polarization-maintaining fiber to building precision fogs, “portable” in relation to a mobile phone, vehicular bomb jamming cellular, due to the convenience of carrying. Putting personal items into the item security passages. A mobile jammer circuit or a cell phone jammer circuit is an instrument or device that can prevent the reception of signals by mobile phones, 2-day and overnight are available at, but also you will lose your kindness in their heart. Development of satellite communication is less than a hundred years. Because modern radars can have sophisticated signal processing and/or ECCM capabilities, the unit is controlled by microprocessor for DDS programming and uses unique modulation technique based on mixed signal for maximum jamming efficiency, there is a sticker on the back of the unit that shows how to change the device to other laser types, we obtain almost sure asymptotic stability conditions for ... the humerus fits into the rounded socket of ..., establishing the system design and selecting suitable components. Phoenix Air won this competitively bid contract by offering two highly-modified Gulfstream G-I aircraft with flight crew, it perhaps the most popular mobile jamming device in the world. WiFi GPS L1 all in one jammer high-capacity (USA version), 8G GSM 2G 3G 4G cellphone signal blocker RF network mobile phone signal
